

Canning and Preserving.

Sweet Pickled Strawberries.—Prepare two quarts berries as for canning. Add two cups sugar and slowly heat mixture to boiling point. Add half pint vinegar and continue boiling ten minutes. Then keep the berries over a slow fire, but below the boiling point, for one hour. Place berries in jars and boil sirup until it thickens. Fill jars to overflowing with the sirup and seal at once.

When Canning Cherries, if you should like the flavor of raspberries, take one-fifth as many berries as cherries; you will find that they make a much richer pie than cherries or berries alone and are not nearly so full of little seeds as when the berries are used alone.

Sweet Pickles.—One gallon good vinegar, one cup salt, two ounces ground cinnamon, two ounces ground mustard, two ounces ground cloves, two ounces ground allspice, 1 ounce ground alum, four ounces ground horseradish. Stir everything together. (This will make three gallons of pickles.) Pour over pickles, let stand two days, pour off, let come to boil, let cool, pour back on, cover with grape leaves and weight. They will keep for a year. They are fine.

New Way to Label Fruit Jars.—Cut out pictures to represent the different kinds of fruits and vegetables from seed catalogs and magazines. If there are not enough pictures for every kind, copies may be cut from white paper and tinted with water colors. This method of labeling is especially nice for home-canned vegetables. Another thing is that it gives employment to the children. They will enjoy cutting out pictures and making duplicates from a pattern with their parents.

Carrot Conserve.—Dice carrots very small and cook very tender, covering the water out of them. When cooked, allow one quart carrots, 1 1/2 cups sugar and grated rind and juice of a good-sized lemon. Cook again until thick. It has a very rich flavor on the order of quince or orange marmalades.

Health Notes.

When walking keep the chest elevated and breathe deeply through the nose. A long walk may then be taken without exhausting effects.

The constant use on the teeth of powdered charcoal or pumice stone is injurious, as such powders break the enamel and the teeth will then quickly decay.

The daily use of the curling iron will often cause the hair to become harsh and broken. This is caused by the heat taking away the natural oil. See that the iron is only moderately hot or abandon its use altogether.

In treating the scalp for dryness use olive oil. Put a small quantity of the oil in a saucer. Use a very small brush (a child's toothbrush is good for this purpose). Before applying the oil to the roots all tangles must be removed and the hair divided into two parts. Using the parting line, a little oil is rubbed, using the finger tips only.

Then another clear line, close to the first, is made and the operation is repeated until the whole scalp has been covered. Do not apply more than the scalp will readily absorb. One application two or three times a week is sufficient. You will find that this application of olive oil, besides neutralizing the condition of dryness and making the hair easier to handle, has the added virtue of tonic properties, and if it is massaged into the scalp beneficial results will be pronounced. A little vaseline—a very, very little on the tip of each finger—rubbed carefully into the scalp twice or three times a week is also beneficial to dry hair.

Preparing Milk.

The following are different ways in which milk may be prepared for children who dislike to take milk:

Beat the yolk of an egg light, add a teaspoonful of sugar and half a teaspoonful of lemon juice; fill the cup with milk, stir well and call the mixture snow lemonade.

Heat a cupful of milk, but do not let it boil, sweeten it and flavor with a little cinnamon and pour from a tiny teapot, calling it cinnamon tea.

Put a cupful of milk and the white of one egg into a glass jar; add a little sugar, screw down the top of the jar and shake until the ingredients are thoroughly blended; flavor with orange and serve as orangeade.

Cocoa made with milk is liked by most children, and is even more nutritious than the milk alone.

Polishing Shoes.

To the woman who cleans and polishes her own shoes, nothing is more useful than the "polishing glove." It is made in the form of a mitt. The palm side is sheepskin, with the woolly side out to form a polishing surface; the back of the mitt is a piece of leather. After you have carefully anointed your shoes with shoe paste or polish and let it dry thoroughly, slip on the mitt and polish with a will. In a moment your shoes will be shining nicely.

Fish Salad.

Remove the skin and bones from any firm bodied fish—salmon or halibut being especially good. Arrange these flakes on a layer of shredded lettuce leaves. Continue in this way until the fish is used up. Garnish with cucumber and the hearts of the lettuce; serve with mayonnaise sauce.

Eggs baked in tomato sauce make a savory dish.

To the Public.

"I feel that I owe the manufacturer of Chamberlain's Colic, Cholera and Diarrhoea Remedy a word of gratitude," writes Mrs. T. N. Witherall, Gowanda, N. Y. "When I began taking this medicine I was in great pain and feeling terribly sick, due to an attack of summer complaint. After taking a dose of it I had not long to wait for relief as it benefited me almost immediately." For sale by all druggists.

Wealth and religion seem to have but little in common.

The Alcohol Milk Test

The alcohol milk test, used to some extent in Europe and believed by some investigators to be a quick means of testing the condition and keeping quality of milk, is not a satisfactory substitute for bacterial examination, according to bacteriologists of the department of agriculture. The alcohol test is based on the fact that when equal parts of 68 per cent alcohol and milk are mixed and the mixture shaken gently in test tube, a flaky, white precipitate will form under certain conditions. The occurrence of this precipitate is held, by those who believe in the test, to indicate that changes have been produced in mixed market milk as a result of bacterial fermentation. The department's investigators who have reported on the results of this test, in Bulletin 202, "The Alcohol Test in Relation to Milk," however, find that alcohol will produce this precipitate when the mixed market milk contains a certain amount of lactic acid or rennet produced by varieties of bacteria which form these substances. As a consequence, milk may be high in bacteria of other varieties without showing the precipitate when alcohol is added. Moreover, it has been discovered that even with lactic acid or rennet-forming organisms present in the milk, the precipitate does not show until these organisms have produced a considerable substance which seem to cause the reaction with alcohol.

In the case of mixed market milk, which frequently contains many varieties of bacteria other than the lactic acid or rennet-forming kinds, the alcohol test may be negative when the bacteria examination shows a high count.

On the other hand, in the case of milk from a single cow, the investigation apparently establishes the fact that a positive reaction in a 68 per cent alcohol test indicates that the milk is abnormal. Even here, however, the value of the alcohol test with milk from a single cow, or a small herd, lies principally in the fact that it will show when the milk is abnormal and will give warning that a careful examination of the herd should be made. It also might indicate the need for improvement in the method of handling and chilling the milk, with the object of checking the growth of milk-couring organisms.

Kerosine Emulsion.

Lice and mites are the bane of the poultryman, and he must keep up a continuous fight if he would hold them down. It is not so much an impossible task. The secret lies in being always prepared with effective materials, and in applying the remedy at regular intervals, frequent enough to keep the pests from multiplying over and over again.

One of the best means of fighting vermin is the use of kerosine emulsion applied with a force spray pump. It is especially effective for mites, the worst of the two pests and hardest to exterminate. To make the emulsion, kerosine in the proportion of two gallons to one-half pound of whale soap, one quart of homemade soft soap, and one gallon of water, are mixed. The soap is dissolved by boiling the water, and while hot the kerosine is mixed in it. This mixture is then stirred or churned rapidly until it becomes well mixed and smooth, as in beating cream. The mixture is then diluted with water, three to five times, before being applied.

A bucket spray pump such as is used by gardeners is just the thing to apply this spray, as it can then be forced into every crack and crevice in the poultry house. This job of spraying should be most carefully done, for if just a few mites or lice are missed there will be enough to have the house infested again just as badly as before, in a very brief time. A little carbolic acid mixed with the spray before applying will make it more effective.

Healing Lotions.

Some excellent healing lotions can easily be made at home and at almost no expense. An excellent lotion for sores of any kind, especially old or ulcerated sores, is made with the white of one egg beaten to stiff froth and then mixed thoroughly with one teaspoonful each of vinegar, honey and whiskey and a lump each of salt, alum and bluestone about the size of a small pea. For inflammatory rheumatism, dissolve one ounce of pulverized saltpetre in a pint of sweet oil and thoroughly rub the parts affected. For neuralgia, sciatica or common rheumatism, take a large Irish potato and boil it in one quart of water. Bathe the affected part at night before going to bed, with the water in which the potato has been boiled, as hot as can be borne, then crush the potato and use as a poultice. In the morning heat the potato water over again and use as hot as can be borne. Continue this treatment for two or three days, or until relieved.

It is more satisfactory to go and turn something up than it is to sit down and wait for it to turn up of its own accord.

Before congratulating yourself when you come out on top, bear in mind that the froth on a glass of beer does the same.

Biliousness and Constipation. It is certainly surprising that any woman will endure the miserable feelings caused by biliousness and constipation, when relief is so easily had and at so little expense. Mrs. Chase Peck, Gates, N. Y., writes: "About a year ago I used two bottles of Chamberlain's Tablets and they cured me of biliousness and constipation." For sale by all druggists.—Adv.

There is notable disparity in the tailor's and the world's measurements of a man.

PATMOS

Sept. 15—Few people were left in Patmos last Wednesday and Thursday. Nearly all were at the Canfield fair. A number of the W. C. T. U. ladies of Canfield, Berlin Center, North Benton, Beloit and Patmos were busy distributing prohibition literature at the fair Wednesday. Over 4000 sheets were distributed in the two days. The Goshen township board of education met at town hall Saturday afternoon.

Mr. and Mrs. E. J. Rummel visited Sunday with Homer Greenmeyer and family of Atwater.

Mr. and Mrs. George Hinchman visited with Mrs. Hinchman's sister, Mrs. Eliza Bradshaw, Sunday.

The East Goshen W. C. T. U. met at the home of Mrs. Nora Shreve on the afternoon of Sept. 7. The meeting was called to order by the president. A portion of scripture was read by the secretary and the invocation given by Sarah Stratton. Roll was called and nine members responded with scripture verses. Minutes were read and accepted. This being the time to appoint superintendents for the different departments of the work, these were named as follows: Contest, Ella Stanley, Sadie Pim and Edith Malmesbury; parliamentary, Sarah Stratton; rescue and purity, Elizabeth Woolman and Margaret Stanley; flower mission, Anna May Stanley and Mary Myers; Sabbath observance, Nora Shreve; press work, Anna Toot, Edith Miles and Anna Whitney; mothers, Anna Santee; mercy, May Stanley, Alice Malmesbury; infirmity, Clara Wise.

Mrs. Elizabeth Tempin returned home Sunday after spending several days with relatives in Canfield.

MARQUIS

Sept. 16—Henry Kohler and son Daniel, Wm. Hunter, wife and son Ivan were Sunday guests at Jonas Lynn's near East Lewistown.

I. W. and E. W. Coy attended the funeral of Mrs. Stelvin Coy in East Lewistown last Friday.

Elmer Davis and family were recent visitors in North Jackson.

A daughter was born Sunday to Mr. and Mrs. Edward Nolan.

Mr. and Mrs. Joseph Reber were home from Millville over Sunday.

Dr. Coy of Canfield called here Friday.

Edwin Hoffman and wife of Canfield, Fern Wellendorf and family and Mrs. Ida Good of North Lima, spent Sunday at John Schaal's.

Ira Cool and family of Canfield toonip passed through here Sunday. Fred C. Reber and wife of Alliance visited his parents here last week and are now on a trip to Mich.

E. W. Coy went to St. Louis to purchase cattle.

Mr. and Mrs. Guy Rhodes were here from Greenford Tuesday evening.

Martin Coy and Geo. Harter of East Lewistown were callers here the first of the week.

BLANCO

Sept. 15—Dr. McDougall and wife of Youngstown were Sunday callers at John Porter's.

Mrs. James Weasner was in Alliance Friday.

Harry and Burton Kale transacted business in Alliance Monday.

James Harding of Ellsworth spent Saturday with W. J. Force.

Mr. and Mrs. Emory Kale and daughter Zella and niece Mabel, Mrs. Jacob Heisel and son Homer spent Sunday with B. N. Miller and family of Unity township near Columbiana.

Mrs. W. J. Force spent several days last week with relatives in Youngstown.

Mrs. Chas. Smith was a Patmos caller Monday.

Mrs. Marie Williamson spent several days last week with friends in Youngstown.

Mrs. George Swank and son Harley visited friends in Parkman, Friday.

Mrs. Martha Rosenbaum spent Friday with Mrs. Hiram Helsel.

Bill Pritchard spent Tuesday at W. F. Renkenberger's.

DO IT NOW.

If with pleasure you are viewing any work a man is doing,

If you like him or you love him, tell him now,

Don't withhold your approbation till the person makes oration

As he lies with snowy lilies o'er his brow;

For, no matter how you shout it, he won't really care about it;

He won't know how many teardrops you have shed;

If you think some praise is due him, now's the time to slip it to him,

For he can not read his tombstone when he's dead!

More than fame and more than money is the comment kind and sunny

And the hearty, warm approval of a friend,

For it gives to life a savor, and it makes you stronger, braver,

And it gives you heart and spirit to the end;

If he earns your praise—bestow it; if you like him, let him know it;

Let the words of true encouragement be said;

Do not wait till life is over and he's underneath the clover,

For he cannot read his tombstone when he's dead!

—Philadelphia Telegram.

WHEN WE GROW OLD.

When we grow old, and when the way has wearier ground, maybe,

Remember you'll find that day As truthfully to me?

When we grow old, sweetheart, and when Love's tenderest shall we whisper then, Dear love, when we grow old?

Now time is young—how light, how young

We scarce can hear his feet. Save that each footfall leaves some song To make our dreamland sweet.

But time steals on, sweetheart; and when His steps have heavier grown, I wonder, shall we hear them then, Dear love, when we grow old?

Dear heart, when we grow old I'll wean, Your hands in mine I'll take, And all the old, old love has been We'll tell for new love's sake.

What though each passing year may bring, A halting speech and slow, As truly as of yore 'twill ring, Dear love, I love you so

—Answers.

School Suits.

Bring your boys to Wiener's store and let them out with good reliable school suits, extra pants, good strong hose and underwear at lowest prices.

NEIGHBORHOOD NEWS

—The Presbyterian church in Alliance will soon undergo extensive improvements.

—Mrs. Lovina Stroup died Tuesday at her home in Leavittsburg at the ripe age of 90 years.

—John Gifford died in Niles Sunday after a long illness, aged 74. Funeral services were held Wednesday afternoon.

—It won't be long now until a lot of people will be longing for some of this hot stuff about which they are prone to complain.

—Carl Westover, hurrying to work on a bicycle in Alliance Monday morning ran into a street car, sustaining a broken collar bone and fracture of both legs.

—At the November election Leetonia will vote on the question of issuing \$25,000 in bonds to provide a sewage disposal plant and two trunk line sewers.

—A. C. Merriek, a farmer residing two miles northeast of Kensington, Columbiana county, dependent and suffering from paralysis, committed suicide by hanging himself in his barn.

—M. P. Briggs of Leetonia, aged 45, fell 25 feet last Saturday from the roof he was repairing for John Ginther, two miles south of Leetonia, and sustained serious internal injuries.

—Peaches sold as low as 40 cents per bushel in Cleveland on Friday in the wholesale district. The crop this year is the largest ever known in this state, although there are very few orchards in this part of the state with a crop.

—Mrs. Anna Cliffe, wife of Rev. C. S. Cliffe of Girard, died Saturday in the Youngstown hospital after a long illness. Just prior to his wife's demise Mr. Cliffe received word of the death of his mother, aged 80, in Akron, following a stroke of paralysis.

—While driving in a buggy across the Youngstown and Southern tracks on the Boardman-Poland road shortly after a. m. Sunday, Irwin M. Kerr, aged 73 years, for fifty years a well known resident of Boardman, was struck and instantly killed by a milk car.

—Farmers in a field along the Niles and Warren brick road were observed making hay on Saturday. Better late than never.—Niles News. Put your agricultural editor on the job and he will tell you that the second crop of hay, better than the first, was being harvested.

—Joseph Green, a puddler employed at the rolling mill in Girard, died Monday. Green was overcome by the heat while at work and had some for a drink. After obtaining the drink he said, "I am too sick to work."

He walked only a few feet and sank to the sidewalk. He was dead before any one could reach his side.

—A five months' old pig belonging to John Heinsdale, near Barborton, was buried five months under a haystack and was still alive when taken out. The pig disappeared last March. It then weighed 85 pounds. When found it weighed 15 pounds. After being given a small quantity of milk the animal keeled over dead.

—About two thousand people attended the farmers' picnic last Saturday in Shilling's or Myers' grove in North Jackson.

—North Jackson was president of the day. Addresses were made by D. W. Galehouse who reviewed county agriculture, Hon. A. O. Fleming was eloquent on the "American Spirit," Carl Harper of Geauga county and the representative of Portage county in the state legislature gave interesting talks of interest to farmers and others. The day was voted by all present one of the most pleasant and profitable of the year.

—Alliance was shocked Monday when it was learned that Harold, four-year-old son of Mr. and Mrs. Richard Fulton, had been kidnapped and carried to Lake Park, between Alliance and Sebring, by unknown scoundrels and slashed with a razor or stiletto across the back, abdomen and otherwise mutilated. The little victim of the outrage was placed in a clump of bushes where his assailants evidently expected him to die, but his groans were heard by a passerby who called assistance and hurried him to the Alliance hospital where he hovers between life and death from loss of blood. The police are working on the theory that the crime was committed by foreigners in a spirit of revenge for real or imaginary grievances and hope to land the culprits in prison.

OHIO HUNTING SEASONS, 1915

(All dates mentioned below are included in hunting season.)

Quail, Hungarian or gray partridges, ruffed grouse, Mongolian, English ring-necked pheasants and Carolina dove are protected until November 15, 1915.

Wood duck is protected until 1918.

Wild duck, wild goose, brant and other wild water fowl—Sept. 1 to Dec. 15, and from March 1 to April 20.

Rail, coot or mudhen, and gallinule—September 1 to November 30.

Black breasted and golden plover, Wilson or Jack snipe, greater or lesser yellowlegs—Sept. 1 to Dec. 15.

Woodcock—Oct. 1 to November 30.

Rabbits—From Nov. 1 to Jan. 1.

Squirrels—From Sept. 15 to Oct. 20.

Foxes—From Oct. 2 to Jan. 1.

Raccoon—From Nov. 1 to March 1.

Muskrat—From Jan. 1 to April 1.

Skunk—From Nov. 15 to Feb. 1.

It is not lawful to hunt, pursue, or kill game on Sunday. Wild water fowl must not be killed before sunrise or after sunset.

State of Ohio, City of Toledo, Lucas County, ss.

Frank J. Cheney makes oath that he is senior partner of the firm of F. J. Cheney & Co., doing business in the City of Toledo, County and State aforesaid, and that said firm will pay the sum of ONE HUNDRED DOLLARS for each and every case of Catarrh that cannot be cured by the use of Hall's Catarrh Cure.

Sworn to before me and subscribed in my presence, this 17th day of December, A. D. 1915.

A. W. GLEASON, Notary Public.

Hall's Catarrh Cure is taken internally, and acts directly on the blood and mucous surfaces of the system. Send for testimonials free.

McKelvey's "THE BIG STORE"

Youngstown's Best Store for Values

The McKelvey Wearing Apparel Section is a Source of Correct Style Information--A Very Interesting Place--An Active Busy Shop.

Exclusive Models in Fall Suits at \$25.00

An exhibition characteristic of McKelvey high standard of quality. The pretties and most stylish suits imaginable—so entirely far away from the style ideas expressed generally in \$25.00 Suits—just look at the modeling; the material and the tailoring, and you will quickly see why they are so much admired by fashionable women—very prominent in the group are the

Fur Trimmed Suits

And here also is displayed the touch of individuality so very rare in the ordinary tailored suit at \$25.00—the fabrics are Serges, Gabardines, Whipcords and Broadcloths in all the new Fall shades.

Suits at \$19.75 With the Style and Quality of Higher Priced Models

The economical woman or miss should investigate this value—suits that are simply wonderful at the low price of \$19.75. They are made of poplins, serges, whipcords, etc., and can be had in all the leading Fall shades besides the ever popular blues and blacks—the military styles predominate—some trimmed with rich furs, others with braid—beautifully tailored and finished.

Many Misses' and Juniors' Sizes in the Assortment

Suits for the Miss going away to school or the young woman who likes to retain the effect of youthful dress—many smart dashing models that are very becoming to the miss of 16, 18 and 20 summers.

Deliveries by Automobile to Canfield Every Tuesday and Thursday.

THE G. M. MCKELVEY COMPANY

Youngstown, Ohio

A Few Business Facts Worth of Consideration.

One billion bushels of wheat, 3,000,000,000 bushels of corn, grass, oats, rye, barley in immense quantities.

The South producing grain, fruits and vegetables this year to a value of several hundreds of millions of dollars more than the value of the cotton crop, and the value of the cotton crop to be advanced by our government's compelling recognition of our freedom of the seas, these are some of the agricultural results of the nation for the year 1915.

A record-breaking year in the tonnage and values of iron, steel, coal, coke, copper, zinc and lead, produced and marketed.

A billion dollars balance of trade in this nation's favor for the fiscal year closed June 30, 1915, and one of \$2,000,000,000 in amount probable for the present fiscal year.

Two hundred and eighty million dollars in gold brought into our ports during the first eight months of this calendar year, an exceedingly handsome and useful addition to the volume of our currency, and more than three times that amount still due the people of the United States for shipments delivered or being prepared.

Ninety-six million dollars produced in 1914 by the gold mines of the United States, and that sum to be increased by those mines in the present year, and all this at the time when our gold commands a high premium, compared with the paper currency of European nations.

Our mills, factories, furnaces, shops and railways busier than they have been at any past period and their pay rolls carrying more names and the wage scales at a higher per capita level ever before known in the United States.

In one single industry, an industry of less than 20 years existence, an output this year of upward of \$500,000,000 in value, and the people of the United States, as well as of other countries, unable to get their orders quickly filled for motor vehicles by one manufacturing company of the United States.

It is a most gratifying business exhibit for our republic; it is a most encouraging outlook for the farmer, the manufacturer, the merchant, for the skilled and unskilled labor, and for the banker and the investor, two classes of our people whose secure and unalloyed prosperity can only be made permanent by the permanent prosperity of the masses of the people.

It is the time of all times that the merchants of this country should recognize the value of the highest grade merchandise for these coming months, the purchasing power of our 100,000,000 of people will become far greater than they ever before possessed.

The distribution of merchandise in the majority of lines of trade will be enormously increased over the highest records hitherto made.—Cincinnati Enquirer.

Advice.

You'll find that life's no round of joy, And when you trip like other men, Don't quit, just show your gameness, boy,

Get up, and start right in again. —Cincinnati Enquirer.
